

FINANCE AND TRADE.

The Telegraph Market reports will be found on the third page connection with their regular telegraphic matter.

On the 23rd of February, the local market was working close during the past week and closed with unsatisfactory results. As March approaches there are indications of uneasiness in financial circles, as at an early day in that month there is an unusually large paper falling due. The recent advance in cotton will doubtless have a highly favorable influence, but in the absence of other aid it is feared the cotton market will have upon business beyond the ken of man, but it is suggestive of the gravest apprehension and may lead to a further rise in the cotton market.

This being the 23rd of February, a holiday in New York, there was little commercial news received from that city. New York on the street at 10:30 a.m. was quiet and the market was very strong and active, with very light offerings. We quote:

There was less than usual doing today in government bonds, as the news from Washington was not calculated to strengthen confidence in government securities.
